MEMORANDUM FOR THE RECORD

SUBJECT: Emergency Power for Model 1 and Model 2 Incinerators

1. Chief, Physical Security Division, called me on the morning of 9 June 1961 to announce the decision regarding the emergency power that will be accepted for both the Model and Model 2 Air-Fed Incinerators. Security has decided that they want to use gasoline engine powered generators.

25X1

2. Now that this has been decided it makes our job much simpler. We only have to worry about the incinerators, and Logistics and Security will decide when and where the generators are to be used. We, of course, will help recommend the proper generator.
